*Reasons for allowance*

1. This communication is in response to applicant's 03/24/2006 amendment in the application of Shahrier et al. for a "Method and system for a low-overhead mobility management protocol in the Internet Protocol layer" filed 02/20/2002. The proposed amendments to the claims have been entered and made of record. Claims 1-2, 9, 12, 14 have been canceled per Applicant's request, and claims 3, 6, 10, 13, 15 have been amended. The claims have been amended to better point out and more distinctly claim subject matter comprising the invention.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. Authorization for this examiner's amendment was given in a telephone interview with Mr. Frederick Koenig III (Reg. #29,662) on June 14, 2006.

3. The application has been amended as follows:

IN THE CLAIMS:

I. Claim 15: Cancel.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Claims 3-8, 10, 11, 13 are allowable as evident by applicant's amendment (Claims are renumbered as 1-9 respectively).

6. The following is an examiner's statement of reasons for allowance: The instant application is deemed to be directed to a nonobvious improvement over the invention patented in closest prior arts of record. The improvement comprises wherein each router is an Access Router (AR) having a unique Internet Protocol (IP) address and a geographic access range in which the ARs communicate data to the MNs; each MN is associated with a home AR; each AR has as its Mobile Node Location List an associated Node Location Table (NLT) identifying each MN for which the AR is the home AR and the IP address of a current location of each such MN; wherein each Router is a Network Address Translation router (NAT) further comprising a plurality of networks, each having a different one of the NATs with a unique global address, at least one Host associated with the network's NAT, and at least one Mobile Node (MN), each Host having a service area in which it can communicate data to the MNs; each MN having a home Host in a home network which defines a default local address which is paired with the global address of the home network's NAT to define a default binding of the MN; the NAT of each network having as its Mobile Node Location List an associated Mobile-Home Database (MHD); wherein the home AR maintains a Node Location Table (NLT) identifying each MN for which the AR is the home AR and the IP address of a current location of each such MN, the

current location IP address being the third IP address which equal to the second IP address if the MN is in communication with the Internet via its home AR, and the home AR creates the data portion of the second datagram by referencing the Node Location Table (NLT); wherein the MHD identifies 24 bit local and global addresses and a location field such that each MN, which has as its home Host, a Host associated with the NAT, is identified with a 24 bit local address of a current association of the MN with a Host associated with the NAT, a null global address, and a home flag in the location field, or a binding defined by a 24 bit local address of an association of the MN with a Host not associated with the NAT and a 24 bit global address of the NAT associated with that Host and an away flag in the location field; and each MN, which is currently associated with a Host associated with the NAT, but has a home Host which is not associated with the NAT, is identified with a 24 bit local address of the current Host association of the MN, a null global address, and a home flag in the location field, as specifically recited in the claims.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
